

Phoenix Air 4050

The **Phoenix Air 4050** oven is an evolution on our previous DTF ovens. The new lower heating system and gas spring lifting mechanism help to ensure your prints cure with less power consumption, more even heating, and more stable curing. These features make our Phoenix Air 4050 oven a valuable and popular option for all DTF sheet printers!

Features

- Easy to operate
- Easy to maintenance
- Friendly for beginners
- Desk-top version but efficient
- Lower heating system
- Build-in Air Purifier

Benefit

- Power saving and more stable curing
- Build in Air Purifier - Save space & money

Compatible with

- Seismo 20 / Miro 13
- All the DTF sheeting printing Process

Specifications

Item No.: D.01.01.0014-220V

Voltage: 220V

Power Consumption: 1000W

Temperature Range: 0-150°C

Max. Baking Size: 40*50cm (38*48 in full image printing)

Machine Weight: 19kg

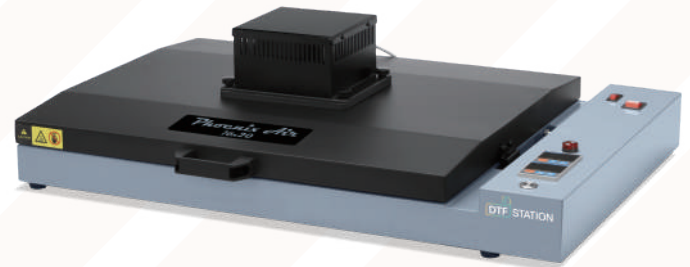

Packaging Weight: 21kg

Dimensions: Machine: 790*590*250mm

Packing: 815*590*255mm

Warranty: One year warranty on the entire machine

Suitable Users: All DTF sheet printing users
