Laser Engraver Marking Paper

Trustworthy choice

Thank you for choosing xTool products!
Sincerely hope they will bring you joy.

Instructions

1.Clean

Clean the surface of ceramic object to be engraved or printed, and blow dry.

2.Prepare material

Cut the laser engraver marking paper into a piece of paper larger than the pattern, and soak the paper in pure water.

3.Attach

Peel off the colored side of the marking paper, and then stick it on the surface of the ceramic object to be marked.

4.Air dry

Remove the air and moisture bubbles between the marking paper and the ceramic with a rubber scraper, and dry the moisture with a hair dryer.

5.Laser mark

Place the object to be processed on the machine for laser engraving to color the pattern on the surface of the ceramic object.

6.Clean

Soak the object to be processed in water, then peel off the remaining marking paper on the surface of the ceramic object and wipe it clean.

Precautions: Before laser engraving, you need to use a small scraper to remove the moisture between the marking paper and the object to be engraved.

*Marking paper may stain the item, do not place it directly on your desktop or mat. **Please store it back in the bag after use.**
